Sheep and Goat Feeding Belt

Keep your work simple

MP Feeding Belt Sheep and goat feeding belt

The MP Feeding Belt is the ideal solution for sheep and goat herds' feeding as the amount of feed is distributed equally and uniformly to animals at a speed adjustable by the farmer.

Technical specifications

- Made of hot-dip galvanized metal.
- Individual head locks.
- Inverter with digital display.
- Sizes from 10m to 100m.
- Motor 2.2kW 380V 50/60Hz.
- 6 animals per meter.
- 600mm wide PVC belt.
- Stainless steel or hot-dip galvanized side protective covers.
- Ø8 galvanized chain.
- Adjustable speed.
- Photoelectric cell.

Operating characteristics

- Adjustable belt speed.
- Secure locking per position, which also simplifies marking and vaccination.
- Time saving.
- Minimum space requirements.
- Special design for maximum ergonomy and installation even in existing buildings.
- Reverse operation for the collection of the feed remains.
- Extendability.
